Summary

Software Engineer with 3+ years of professional experience building scalable web applications using **React.js, Next.js, TypeScript, JavaScript, C#, .NET Core, and Go**. Experienced in developing responsive and reusable frontend components, integrating REST APIs, debugging complex issues, and working across the full SDLC. Strong experience with **Next.js, Tailwind CSS, shadcn/ui**, frontend-backend integration, API development, and production deployments. Experienced in using AI-assisted development tools including **OpenAI Codex, Claude, and Kiro AI** to improve development efficiency, debugging, refactoring, UI implementation, and code quality.

Work Experience

Medical Wizard - Software Engineer Oct 2025 – Oct 2026

- Developed and maintained full-stack healthcare applications using **React.js, Tailwind CSS, C#, .NET Core, and Go**.
- Built responsive and reusable frontend components using **React.js and Tailwind CSS**, supporting complex healthcare workflows.
- Contributed to **MedNext Clinical** and **MedNext eReception**, supporting clinical workflows, document management, appointments, billing, patient administration, and reception operations.
- Integrated React-based frontend applications with backend services and **REST APIs** developed using C#/.NET Core and Go.
- Contributed across the full SDLC, including requirements analysis, solution planning, development, testing, debugging, deployment, and maintenance.
- Implemented and maintained **.NET executable (EXE) services** supporting application workflows and backend processing.
- Performed frontend and backend debugging, refactoring, integration, and defect resolution to improve application reliability and maintainability.
- Leveraged **OpenAI Codex, Claude, and Kiro AI** for code development, technical investigation, debugging, refactoring, testing, and UI implementation.

Derana Macroentertainment - Associate Software Engineer March 2023 – July 2025

- Developed and maintained responsive and reusable UI components using **Next.js, Tailwind CSS, and shadcn/ui**.
- Worked on frontend development and integration with backend services to deliver production-ready web applications.
- Refactored backend APIs using **Nest.js**, reducing average response time by **35%**.
- Deployed and monitored production applications using **Vercel, Firebase, and Netlify**, maintaining **99.9% availability**.

Voxitec Full Stack Developer - Intern January 2022 – June 2022

- Developed full-stack application features using **React.js and Node.js**.
- Integrated MongoDB, followed Git-based development workflows, and contributed to improving application code quality.

Projects

Scam Email Detector — Next.js, Node.js, Prisma, RapidAPI

- Developed a real-time scam email detection web application using **Next.js** and OpenAI's **GPT-4** via RapidAPI.
- Integrated a custom API route to manage usage limits and communicate with the GPT-4 API.
- Used **Prisma ORM and PostgreSQL** to store and manage scan results.
- Designed a scalable API structure supporting future AI model upgrades and integration changes.

Sri Potha: A Voice-Based Sinhala Document Maker — Research Project

- Developed a voice-based document creation system that converts Sinhala speech into editable text documents.
- Implemented speech-to-text functionality and document generation features.
- Published research findings at an IEEE conference.

Impacnet - Social Media Platform

- Full-stack social platform with posts, petitions, and organizations
- Stack: Next.js, Tailwind CSS, GraphQL, Firebase, AWS-hosted microservices
- Real-time feed and Firebase authentication

Education

2020 – 2024 **BSc (Hons) in Information Technology**, Specializing in Software Engineering
Sri Lanka Institute of Information Technology (SLIIT)

Certificate

2025-04-20 **AWS training and certification**
2025-07-06 Introduction to Prompt Engineering for Generative AI **LinkedIn Learning**

Publications

- **D. I. De Silva, D. S. P. Piyadali, M. G. S. Dilrukshi** (2023). *Sri Potha: A Voice-Based Sinhala Document Maker*. IEEE Xplore.

Skills

Languages: Sinhala, English
Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui
Backend: .NET Core, Node.js, Nest.js, REST APIs, GraphQL
Database: Firebase, MongoDB, MySQL
Cloud/Deployment: Vercel, AWS (Amplify, EC2, S3), Firebase Hosting, Netlify, CI /CD
Tools: Git, GitHub, Postman
AI Development: OpenAI Codex, Claude, Kiro AI
